

LORRIO — BUSINESS VISION, AIM & ROADMAP

Market Strategy, Expansion Roadmap, Monetization & Long-Term Aim

1. Our Aim & Mission

Our Aim: To build the digital infrastructure connecting construction materials with the people and vehicles that move them across India.

Lorrio starts by hyper-focusing on the ****Kannur ↔ Wayanad Laterite Stone Corridor****, proving the model locally before expanding across Kerala and South India.

2. 4-Phase Growth Roadmap

- **Phase 1 (Current Active MVP):** Kannur ↔ Wayanad Laterite Stone Corridor. Mobile-first app, location picker map, WhatsApp integration, and Return-Load Optimizer.
- **Phase 2 (Regional Kerala Expansion):** Kozhikode, Malappuram, and Kasaragod districts; onboarding M-sand, plastering sand, 20mm granite aggregates, and red wire-cut bricks.
- **Phase 3 (Platform Automation):** WhatsApp bot ordering interface, dynamic pricing algorithms, automated GST e-way bill generation, and driver GPS telemetry.
- **Phase 4 (Enterprise Procurement Hub):** Pan-South India construction procurement software, bulk enterprise contracts, and fleet management SaaS.

3. Revenue & Business Model

1. **Platform Service Fee:** 2.5% fee on every completed transaction.
2. **Freight Transport Take-Rate:** Cut from matched lorry transport freight.
3. **Supplier SaaS Subscriptions:** Premium quarry badges, lead generation, and sales analytics.
4. **Driver Pro Tier:** Priority access to lucrative return loads and earnings optimization tools.
